

An Invitation to See Bird Conservation in Action – Klamath Bird Observatory Presents a Bird Banding Demonstration

We announce a special invitation to a Klamath Bird Observatory bird banding demonstration – open to the public and our bird conservation partners. This will be a fun and informative outing to one of Klamath Bird Observatory's long-term monitoring (that is, bird banding) stations for a two-hour demonstration and education reception. Science Director Jaime Stephens and Banding Project Leader Bob Frey will host this event at an active banding site. Come see wild birds up close and learn how our long-term monitoring program contributes to land management planning and regional and national bird conservation.

The demonstration will take place at the Sevenmile Guard Station on Fremont-Winema National Forest near Fort Klamath (directions below) from 0900-1100 on Monday August 1, 2016.

Refreshments will be provided (coffee, juices, snacks) ... we hope to see you there!

Please RSVP to bif@klamathbird.org by July 26, 2016.

Directions to the Sevenmile Guard Station:

From Oregon Hwy 140 (between mileposts 42 and 43), turn onto Westside Road to milepost 0, where Westside Road becomes Sevenmile Road (there is a strong bend to the east in road). Continue east on Sevenmile Road 1.8 miles to Hackler Road and turn left (north). Continue on Hackler Road 2.4 miles to Nicholson Road and turn left (west). Continue on Nicholson Road 1.3 miles to end (there is a big turnout on left (south) side of road) ... Forest Road 3300 begins at this point (there is a US Forest Service 'Entering Winema NF' sign on right (north) side of road. Continue 0.1 mile on Forest Road 3300 to a fork and turn right (north) ... the Sevenmile Guard Station cabin is immediately on the left (it is the only structure in this part of the forest).

From Oregon Hwy 62 at Fort Klamath, turn onto Nicholson Road 3.8 miles to end (follow directions above from here).
